■ **About the EL backlight**

- This unit is equipped with an EL backlight that allows easy viewing of display contents in a theater, or anywhere else where lighting is dim.
- Note, however, that frequent or extended use of the EL backlight shortens battery life.

The following shows how backlight use affects battery life under controlled test conditions.*

Backlight Operation	Battery Life
Twice per day	Approximately 1 year
10 times per day	Approximately 6 months

• **Test Conditions**

- "Battery Life" is the time before battery failure when the unit is left on for one hour each day (5 minutes operation, 55 minutes display only, no operation), with one alarm operation plus the number of backlight operations shown above.
- "Backlight Operation" is the number of times the backlight is turned on (for eight seconds) per hour during display only (no operation).

■ **About the Low Battery Message**

Replace the batteries as soon as possible after the "LOW BAT" (Low battery) message appears.

- When battery power is low, the "LOW BAT" message will appear after you press **ON/OFF**, **TEL**, **SCHEDULE**, **MEMO/TO DO** or **TIME/ALARM**. If you continue to operate the unit without battery replacement, power will switch off automatically.
- The Daily Alarm and backlight will not operate while battery power is low.
